

Public CourtConnect Apex Build 1.0 Production announcement

On December 14, 2020, a new and improved Public CourtConnect Apex application will be available in Production! Don't worry, the old Public CourtConnect will still be available for a limited amount of time through a link on the new Public CourtConnect application home page.

The AOC has worked tirelessly for some time now to modernize our systems behind the scenes. With our move to the Cloud **please be aware that Public CourtConnect will now have a delay with reporting data from the Contexte Case Management System.**

Initially, the delay will be from 9:00 PM on the previous day. As modernization efforts continue the delay will transition to being from 1:00 AM on the same day. A date and timestamp will be provided in the application letting end-users know when case data is current to. This change will not just apply to the new Public CourtConnect application, but also to the legacy Public CourtConnect application and will also occur on December 14, 2020.
